

ABIMANYU BHAMAKERTI

Tech Lead, Senior Fullstack Developer

- 081298988735
- abimanyu.bhamakerti@gmail.com
- github.com/AbimanyuB
- Bogor, Jawa Barat, Indonesia

PROFILE

Accomplished Tech Lead and Senior Fullstack Developer with extensive experience in architecting scalable enterprise systems. Expert in building high-performance web and mobile platforms using React, Node.js, and cloud infrastructure. Proven track record in leading cross-functional teams to deliver secure, complex solutions across telecommunications, healthcare, and fintech sectors.

EXPERIENCE

07/2025 - Present	Senior Fullstack Developer Aido Health Project: AIDO (Hospital Integration System – Financial Module) Tech Stack: Node.js, Express.js, React.js, PostgreSQL, Redis, RabbitMQ, AWS Responsibilities: - Architected and developed a comprehensive financial system within the AIDO platform to manage complex hospital transactions and billing workflows. - Built scalable backend services using Node.js and Express.js, ensuring high performance and reliability for financial data processing. - Designed and optimized relational database schemas in PostgreSQL to maintain data integrity for sensitive transaction records. - Implemented asynchronous messaging and task queuing using RabbitMQ to handle high-volume transaction processing and system integrations. - Enhanced system performance by leveraging Redis for distributed caching and state management. - Managed cloud infrastructure and deployment pipelines on AWS to ensure 99.9% uptime and secure data handling. - Collaborated with stakeholders to translate complex financial requirements into technical specifications, ensuring the module met strict healthcare compliance standards.
12/2021 - 07/2025	Tech Lead, Business Analyst, Fullstack Developer PT. Phincon Project: Web My Telkomsel Tech Stack: Node JS, React JS, Redux Saga, Vite, Docker, MySQL, Redis, Microservice, AWS, Jenkins, Typescript, Nest JS, Next JS Responsibility - Developed and maintained new features for the MyTelkomsel web application. - Designed and implemented RESTful APIs using Node.js to support front-end functionalities. - Acted as a Business Analyst, responsible for requirement analysis and documentation, including UML diagrams, YAML API specs, database designs, and technical development guidelines. - Managed deployment processes using Jenkins and AWS services. - Led and mentored the development team, providing technical guidance, code reviews, and implementation strategies to ensure high-quality deliverables.

Project: Raisecall

Tech Stack: Nest JS, Next JS, Redux toolkit, Docker, MySQL, Redis, Rabbit MQ, Socket.IO, GCP, Typescript, Kafka, WebRTC

Responsibility:

- Designed and developed scalable, omnichannel CRM features for RaiseCall, a unified customer engagement platform integrating Twitter, Facebook, WhatsApp, Telegram, and voice communications.
- Built and maintained both frontend (Next.js) and backend (NestJS) components, ensuring seamless user experience and robust API integrations.
- Architected real-time communication features using Socket.IO, and implemented event-driven architecture with RabbitMQ and Apache Kafka for reliable and scalable message processing.
- Engineered efficient data handling with MySQL and Redis to support high-performance, low-latency operations.
- Created comprehensive technical documentation and specifications to ensure clear development guidance and alignment with business goals.
- Collaborated across teams using Jira, Confluence, and Figma for project tracking, documentation, and design handoffs.

12/2024 - 04/2025

Fullstack Developer

Norito

Project: Norito (Movie Streaming with Coin Purchase)

Tech Stack: Flutter, Node.js, Express.js, TypeScript, PostgreSQL, ORM, AWS

Responsibility

- Developed Norito, a movie streaming mobile application similar to Netflix, enhanced with a coin-based access system for content consumption.
- Built the frontend using Flutter, delivering a smooth and responsive user experience across both iOS and Android platforms.
- Developed backend services with Node.js and Express.js (TypeScript) to manage user authentication, movie catalogs, coin transactions, and playback permissions.
- Utilized ORM for efficient interaction with the PostgreSQL database, ensuring data consistency and scalability.
- Deployed and maintained infrastructure on AWS, enabling high availability and secure cloud-based service delivery.
- Designed and implemented the coin-based access system, providing a flexible alternative to traditional subscription models.

11/2023 - 03/2024

Laravel and React Native Developer

Easim Global

Project: eSIM Purchase App

Tech Stack: Laravel (PHP) – Backend & Frontend, React Native, MySQL, Payment Gateway Integration

Responsibility

- Developed a cross-platform mobile application using React Native that enables users to purchase and install eSIMs in multiple countries.
- Built both the frontend and backend of the web-based admin panel using Laravel (PHP), enabling management of eSIM products, users, and transactions.
- Designed and managed a MySQL database to handle user profiles, purchase records, eSIM configurations, and logs.
- Integrated secure, international payment gateways to ensure smooth and reliable transaction processing.
- Implemented features for direct eSIM installation on supported devices, improving activation speed and user satisfaction.
- Successfully launched the app on both the Apple App Store and Google Play Store, delivering a consistent experience across iOS and Android platforms.

03/2023 - 11/2023

Frontend Developer

Unisys - University Platform

Project: eSIM Purchase App

Tech Stack: React.js, Python, Django, PostgreSQL, GCP, NGINX, Gunicorn

Responsibility

- Designed and developed a SaaS platform for universities, enabling management of academic operations such as course creation, graduate modules, and university administration.
- Built responsive and interactive frontend interfaces using React.js, ensuring a smooth user experience for both administrators and students.
- Developed scalable backend services with Django, handling user authentication, academic records, scheduling, and course management.
- Managed PostgreSQL databases to store and query structured academic data securely and efficiently.
- Deployed and configured the application on Google Cloud Platform (GCP) using NGINX as a reverse proxy and Gunicorn as the WSGI server.
- Delivered a fully functional, production-ready academic web application to support digital transformation for higher education institutions.

12/2020 - 12/2021

Fullstack Developer

PT. Mitracom Ekasarana

Project: Web My Telkomsel

Tech Stack: Node.js, React.js, Redux-Saga, Docker, MySQL, Redis, Jenkins

Responsibility

- Developed and maintained new features for the Mytelkomsel web application, enhancing user experience and performance across a large-scale telco platform.
- Built and optimized RESTful APIs using Node.js, supporting various customer services and account management functionalities.
- Implemented dynamic, responsive front-end interfaces with React.js and managed complex asynchronous flows using Redux-Saga.
- Utilized MySQL and Redis for efficient data storage and caching, improving response times and scalability.
- Containerized applications using Docker and automated deployments with Jenkins, ensuring a smooth CI/CD pipeline and reliable production releases.

12/2018 - 12/2020

Fullstack and Mobile Developer

PT. Lawencon

Project: Web My Telkomsel, App My Telkomsel

Tech Stack: Android, Java, Kotlin, OOP

Responsibility

- Tech Stack: Node.js, React.js, Redux-Saga, MySQL, Redis, Jenkins, Java (Android)
- Developed and maintained new features for the MyTelkomsel Web, enhancing user engagement and service functionality.
- Built RESTful APIs using Node.js to support both web and mobile platforms.
- Developed the native MyTelkomsel Android app using Java, including user authentication, account management, and service integration.
- Used Redux-Saga for managing complex asynchronous front-end workflows and MySQL/Redis for backend data management and caching.
- Automated CI/CD pipelines with Jenkins to support efficient testing, integration, and deployment workflows.

Project: Mandiri Internal CRM App
Tech Stack: Android, Java, Kotlin, OOP
Responsibility

- Designed and developed an internal CRM mobile application for Bank Mandiri, streamlining internal communication, task tracking, and customer data management.
- Implemented key mobile features including user login, contact management, and real-time task updates, optimizing internal workflow for bank employees.

Project: Mandiri Internal CRM App
Tech Stack: Android, Java, Kotlin, OOP
Responsibility

- Designed and developed an internal CRM mobile application for Bank Mandiri, streamlining internal communication, task tracking, and customer data management.
- Implemented key mobile features including user login, contact management, and real-time task updates, optimizing internal workflow for bank employees.

SKILLS

React JS	Expert	AWS	Advance
Node JS	Expert	GCP	Advance
Next JS	Expert	PostgreSQL	Expert
Nest JS	Expert	MongoDB	Expert
Golang	Intermediate	MySQL	Expert
Laravel	Advance	Redis	Expert
Android	Advance	RabbitMQ	Expert
Typescript	Expert	WebRTC	Intermediate

EDUCATION

03/2021 - 07/2023	Information System Bina Nusantara University Bachelor's Degree
02/2015 - 10/2018	Computer Engineering IPB Univeristy Diploma

LANGUAGE

Bahasa Indonesia	Fluent	English	Intermediate
------------------	--------	---------	--------------
